PROFESSIONAL SUMMARY

Full-stack developer who has built and deployed 14+ database-driven web applications with PHP/MySQL, React.js and Node.js, including a live AI chatbot on the Google Gemini API. Founder of FARVO, delivering booking and management platforms for 4 business clients. Strong in schema design, role-based access control and OTP authentication. HNDIT student seeking a junior software engineer or internship role.

TECHNICAL SKILLS

Backend: PHP, Node.js, Express.js, REST APIs, SQL, PHPMailer

Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap, responsive design

Databases: MySQL, MongoDB, phpMyAdmin, schema design

Security: Role-based access control, OTP authentication, server-side validation

Tools: Git, GitHub, Postman, VS Code, XAMPP, Vercel, npm

Also: Java, Python, C#, UI/UX (wireframing, Photoshop, Illustrator) | **Learning:** TypeScript, Next.js, Docker, AWS

SELECTED PROJECTS

Farvo AI Chatbot | Google Gemini API, Vercel | farvo-ai-chatbot.vercel.app

- Launched a live AI assistant with secure user accounts, synced chat history and file/image attachments by integrating the Gemini API and keeping the API key server-side.

College Management System with OCR | PHP, Tesseract, MySQL | github.com/ltzzFarhanGit/7-Online-College-Management-System

- Automated transcript generation by building an OCR pipeline that extracts grades from documents into official academic transcripts.

Lost & Found Items Tracking System | PHP, MySQL, PHPMailer

- Built a complete claim workflow with admin panel by implementing role-based routing, OTP-verified reporting and OTP password reset.

Online Clinic Management System | PHP, MySQL | github.com/ltzzFarhanGit/4-Online-Clinic-System

- Prevented double-booking by designing per-doctor time-slot logic, with patient records and an admin panel.

Student Assist System | PHP, MySQL, JavaScript | github.com/ltzzFarhanGit/student_assist_system

- Delivered a multi-developer student platform by coordinating page navigation and session-based authentication across team members' modules.

Online Car Booking System | PHP, MySQL, JavaScript | github.com/ltzzFarhanGit/Online-Car-Booking-System

- Built a web-based car booking system on a PHP and MySQL backend.

Online Food Ordering System | HTML, CSS, JavaScript, PHP, MySQL | github.com/ltzzFarhanGit/online_food_ordering_system

- Built a food ordering web application covering the full stack from interface to database.

EXPERIENCE

Founder & Lead Full-Stack Developer | FARVO

Jun 2026 – Present

- Delivered booking, management and business platforms for **4 founder-led clients** (AlmaSpark, Lenzora Graphics, Haksiya Innovations, ARMA Creation) by owning each project end to end: requirements, MySQL schema design, REST APIs and deployment.
- Kept client systems secure and maintainable after launch by applying role-based access control, OTP authentication, server-side validation and ongoing performance tuning.

Freelance Full-Stack Developer | Self-employed

2025 – Present

- Shipped **14+ web applications** (clinic, bookstore, event, employee, booking and attendance systems) by designing multi-module PHP/MySQL architectures with admin panels, authentication and deployment.

English Language Instructor | FR Institute

Mar 2022 – Present

- Teach conversation-focused English and presentation skills, building the communication ability I use in client work.

UI/UX & Creative Designer | Freelance

2024 – 2025

- Delivered brand identities, posters and social media assets using a component-driven design workflow.

EDUCATION

Higher National Diploma in Information Technology | SLIATE, ATI Sammanthurai

Sep 2025 – 2027

GCE Advanced Level | Zahira College, Kalmunai

2023

SELECTED CERTIFICATIONS

Claude Code in Action & Building with the Claude API (Anthropic) • Azure Fundamentals (Simplilearn) • AWS Cloud Practitioner Foundation (ScholarHat) • SQL Advanced (HackerRank) • MongoDB Foundations (ScholarHat) • JavaScript Essentials 1 (Cisco)
